

Charlie Hodge high bilge pump wires.

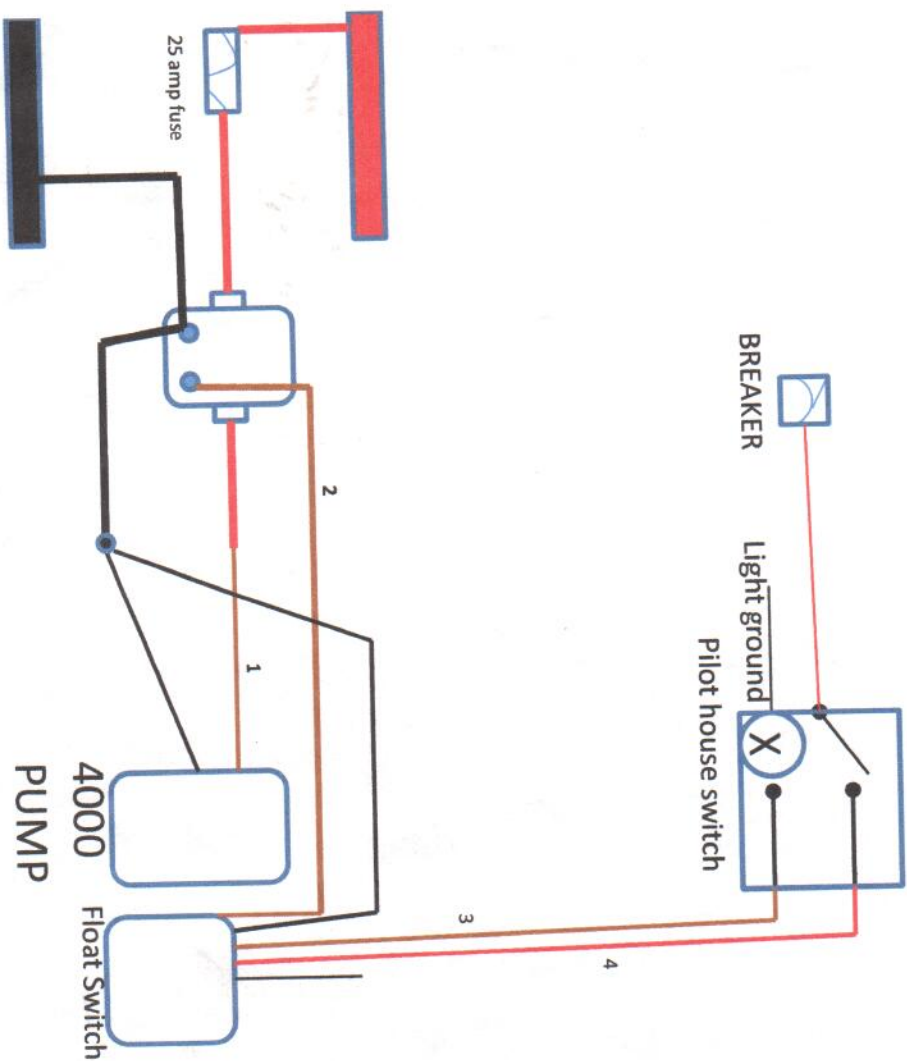

New #16H Water Bilge wire

Rite 4000

Ultra Sensor float switch

Mdnr 2017

BOE Marine

Pump power feed (# 1) is wired to the solenoid.
 1 Brown wire from the float switch (# 2) is wired to the solenoid control. The other brown float switch wire (#3) is wired to the pilothouse auto/manual switch (wire and switch should be in place) The red wire from the float switch (#4) also leads to the pilot house auto/manual switch. (already there)
 Tie all the grounds together, making sure the pump ground is connected directly to the 8 gauge ground wire.
 No alarm wires on this float switch.

ALARM IS ON
 FLOAT SWITCH.
